

# PN2 Aerospace Grade Aramid Fiber Honeycomb

# **Description:**

PN2 aerospace grade aramid fiber honeycomb exhibits outstanding flammability properties. It is manufactured from DuPont Nomex® paper (or equivalent) and coated with a heat resistant phenolic resin.

## **Applications:**

PN2 honeycomb uses include aircraft galleys, flooring, partitions, aircraft leading and trailing edges, missile wings, radomes, antennas, military shelters, fuel tanks, helicopter rotor blades and navy bulkhead joiner panels.

#### **Features:**

- · Fire resistant (self extinguishing)
- · High strength to weight ratio
- · Corrosion resistant
- · Excellent dielectric properties
- Thermally insulating
- · High toughness
- Excellent creep and fatigue performance
- Good thermal stability
- Densities as low as 1.5 lb/ft³ (24 kg/m³)
- Over expanded cell configuration suitable for forming simple curves
- Compatible with most adhesives used in sandwich composites

### **Availability:**

PN2 honeycomb is available in sheets, blocks or cut to size pieces in both regular hexagonal and over expanded (OV) cell configurations.

**Cell Sizes**: 1/8" - 1/4"

**Densities:** 1.8 pcf - 9.0 pcf

Sheet "Ribbon" (L): 48" typical
Sheet "Transverse" (W): 96" typical

**Tolerances:** Length: + 3", - 0" (36" for OV)

Width: + 6", - 0"

Thickness: ± .006" (under 2" thick)

Density:  $\pm 10\%$ Cell Size:  $\pm 10\%$ 

**NOTE**: Special dimensions, sizes, tolerances and

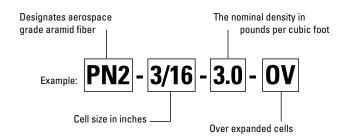

specifications can be provided upon request.

# PN2 aerospace grade aramid fiber honeycomb is specified as follows:

Material - Cell Size - Density - Cell Configuration

Note: 1/8" OV core can be over expanded only to a maximum of 20% over nominal cell size.

®Nomex is a registered trademark of E.I. DuPont de Nemours, Wilmington, Delaware.
