**Roll Wrapped** (Includes Fabric, Unidirectional, Braided Overwrap, & More): +/- 0.006

**Camera Rails (15mm & 19mm)**: +/- 0.006

**Pultruded, Pulbraided Tubing & Solid Rods**: +/- 0.006

**Filament Wound (sanded)**: +/- 0.007

**Filament Wound (unsanded)**: +/- 0.010

Notes:

1. Most round tubes can be sanded to tighter tolerances for additional charge (requires minimum 0.005" less than nominal unsanded OD).
2. Tighter tolerances available for cuts under 120" for additional charge.
3. Current saw capacity allows for cutting up to 4.0" outside diameter tubes, beyond 4.0" OD the tolerance defaults to +/- 0.50".
4. Nominal OD for the 15mm rails is 0.588" or 14.94mm. Nominal OD for the 19mm rails is 0.743" or 18.87mm.
5. Radius of corners not called out - Typically, radius is mentioned in the details for each SKU on the website. Tolerances here apply to all online products unless stated otherwise on product page.
