

Rock West Composites, Inc. has an exciting opportunity for a Quality Engineer

Rock West Composites, Inc. is an engineering and manufacturing company dedicated to providing innovative solutions for commercial and government customers. This position is located in our San Diego, CA-San Ysidro location and reports to the Quality Manager

Position Summary:

Quality Engineer will have the knowledge, skills, and abilities necessary to ensure compliance with customer engineering and quality requirements throughout the production process from receipt of purchase order to delivery of product. This includes customer specific quality requirements, procurement and processing requirements, document control, contract review, and job/work order planning. This position requires a high degree of concentration and multitasking. The position will report to the Quality Manager.

Essential Responsibilities May Include:

Contract review of customer purchase orders to ensure full understanding and compliance with quality and engineering requirements and assessment of any associated risks.

Review and approve of internal work orders to ensure compliance with customer requirements.

Review and approve of procedure, work instructions and/or forms in compliance with industry and AS9100 standards

Internal auditing to AS9100 Rev D requirements and internal standard work

Collaborate with planning, outside processors, and customers to facilitate the creation and approval of controlled manufacturing plans

Assists in the implementation, and administration of other QA and company activities including: risk management, configuration control, training, auditing, corrective actions, continuous improvement, and preventative actions.

Perform in depth root cause, corrective and preventive actions using 5 Y's other root cause analysis tools

Adheres to all workplace safety guidelines, policies, and laws determined by the company, state, and federal authorities

Basic Qualifications & Education:

- Five years experience in aerospace industry quality related roles.
- B.S. in Mechanical Engineering, Aerospace Engineering or Industrial Engineering
- Experience with composite materials and processing techniques such as autoclave, RTM, and compression molding
- Experience with AS9100 quality management system
- Excellent working knowledge of composites
- Self-starter with excellent time management skills and ability to establish objectives and specify the strategies and actions to achieve these objectives
- Understand, follow and adhere to corporate Quality Management System on a daily basis
- Experience with contact and noncontact inspection methods
- Experience with data acquisition systems to record temperature, position and pressure
- Organized, self-motivated, strong attention to detail and high level of accuracy
- Ability to manage multiple duties, set priorities and follow tasks through completion
- Capable of working in an environment in which demands and priorities change

Required Attributes:

Collaborates with external and internal customers, including Manufacturing, Program Management, Engineering, and Sales staff to meet customer requirements, ensure compliance, and continue smooth flow of quality products

Works independently, follows instructions, can concentrate for long periods of time and is able to tolerate multiple interruptions throughout the day

Team player with a can-do attitude.

Why should you want to work with us? Rock West Composites cares about our employees! Not only do we offer great benefits to our full-time employees (Medical & Dental 100% employer paid, Vision, Paid Time Off and 401K match), we offer a fun and friendly working environment!
